

The Check List

For Accurate Spreading

The key to precise spreading is matching fertiliser quality and litre weight with the spreading charts as close as possible. The Kubota Exacta checklist helps you to ensure consistent accuracy in all field conditions.

1 Select fertiliser type.

2 Determine granule size and distribution.

Hydraulic Handles

Our new hydraulic hose handles are designed for easy and efficient connection between your machine and tractor.

With marker kits available in various sizes, featuring clear labeling with plus/ minus symbols and multiple color options, you'll have everything you need to clearly mark your hydraulic hoses and reduce the risk of incorrect connections.

Set Discharge Point

Each disc on your Kubota Spreader has an actuator to adjust and control the discharge point. With the setting tool and elastic rope you are in full control over each section of your spreader.
